Backache of Women

The back is often called the main-spring of a woman's life. What can she do, where can she go, so how as she do, where can she go, so home as that deadly backache saps every particle of her strength and ambition. She cannot walk, she cannot stand her housework is a burden, or the long hours behind the counter, in the office or factory are crushing. She is miserable. The cause is many times some derangement of her system, and backache is a common symptom. Lydia P. Pinkham's Vegetable Compound is a reliable remedy for hackache, as for more than forts years it has been relieving women of America from the aliments which often cause it.—Advertisement.

It's Easy—If You Know Dr. Edwards' Olive Tablets

The secret of keeping young is to feer young—to do this you must watch your liver and bowels—there's no need of having a sallow complexion—dark rings under your eyes—pimples—a bilious look in your face—dell eyes with no sparkle. Your doctor will tell you ninety per cent of all sickness comes from inactive bowels and liver.

Dr. Edwards, a well-known physician in this profested a yearthle com

in Ohio, perfected a vegetable com-round mixed with olive oil to act on the liver and bowels, which he gave to his patients for years.

Dr. Edwards' Olive Tablets, the sub-

stitute for calomel, are gentle in their action yet always effective. They bring about that natural buoyancy which all should enjoy by toning up the liver and clearing the system of impurities.

Dr. Edwards Olive Tablets are known by their olive color 15c and 39c.

Our Tested Banking System is Prepared to Work Out Constructive Programs

THE rapid changes in com-I modity prices, the industrial adjustments, and financial disturbances incident to the periods of war and reconstruction have provided a severe test for the credit and banking structure of the nation.

Our banking system has successfully met that test and occupies today an inherently sound and strong position. The combined resources of all banks in this country are in excess of fifty billion dollars. Approximately one-third of all the gold coin and bullion of the world is held in the United States, and underlies our credit structure.

In the adjustment period since the Armistice, as during the war, the Federal Reserve System has functioned constructively and conservatively. It has met the problems of the hour in a man-, ner to serve and protect the best interests of the nation.

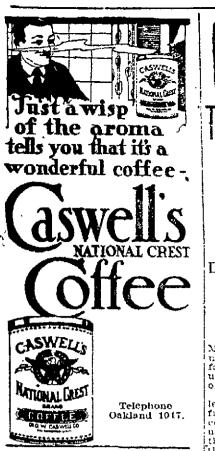

As a member of the Federal Reserve System, this bank has met the essential requirements of its clients. In the working out of the constructive business program the East Bay Cities now face, the Central Banks with their trained organization; their combined resources of over \$46,000,000; and their complete banking service, are prepared to render the fullest measure of as-

But they become more frequent, use lotions by the gation and and gradually increase in sever hever hope to reach the cause of ity, and before you hardly realize it, you are firmly in the grip of a disease that may make you helpless

First of all, you must realize that Rheumatism's pains are not on the surface, and cannot be rubbed away. Then you will discard the liniment bottle, and seek the source of the disease.

Many forms of Rheumatism are due to a tiny germ in the blood, which multiplies by the million and spreads its pain to different parts of the body.

REACH AN AGREEMENT!

Before the committee on municipal corpora tions of the legislature, at a hearing in Sacramento yesterday, representatives of the Berkeley city government developed new objections to the proposed amendments to the law regulating the organization of public utility districts. This came as a surprise, as Mayor Bartlett, after atmet his approval.

That Berkeley has presented new objections before the legislative committee, without first en- it's course without any palliative but exhaustion, at present such a cruise would in deavoring to have them composed in the confercreated the impression of bad faith. But this is held Saturday, to reach an agreement.

Every well-founded and reasonable objection of any one of the municipalities interested should have a careful and cordial consideration, and if is difficult to pacify, however, and if the legislature finds itself facing such tactics it ought to these cases. disregard them in the general public interest.

uppermost in the minds of the proponents of the may. amendment is a new source of water supply for the Eastbay district, this is a fact, not to be altered by any written phrase or the lack of phrase. It is difficult to see wherein the statement is offensive, but it can be omitted if desired.

. The other objection is based on the provision that the organization of the district shall be authorized by a majority vote of the people within the district. The Berkeley representatives want it to require a majority vote of each city within the district.

There should be no desire to infringe unnecessarily upon the freedom of action of any one municipality, and there is no danger that that would be done. But the question of a water supply is common to all the Eastbay cities. The pub-He interest is as much involved in this question in one municipality as in another. There should be full sympathy with any community desirous of safeguarding its individual communal interests. The question cannot be evaded, it cannot be divided; it should not be embarrassed by the scheming of San Francisco's city engineer. 💉

SCHOOL BOARD IS ADVISED AGAINST **AUDIT EXPENSE**

Money Can Not Be Spent To Insure Correct Accounts, State Officials Say.

The right of city school boards to spend funds for an expert auditing of school department accounts is questioned in letters from Deputy State Superintendent of Public Instruction Job Wood, Assistant Counstruction Job Wood, Assistant Courty Superintendent D. E. Martin and Deputy District Attorney Frances Wilson Kidd, according to developments to the Board of Education of Revision 100 Martin 100 Mart

The matter was submitted to the board last night by Director Ida Blochman, The communications tended to show that the Berkeley board, as well as other boards, can not spend money for any other pur-pose except that of education.

The officials questioned the use

of school moneys for expert audits.

Mrs. Blochman's exhibits were a result of agitation by Director Carl Bartlett, who said that as commissioner of revenue and finance he was forced to insist on an expert auditing of school accounts. The mem-bers of the Board of Education refused to agree with Bartlett.

STATE OFFICIAL OPINION
The matter affects Oakland as well

Deputy Superintendent Wood says:
"Permit me to state that the law nowhere authorizes the Board of Education to use its funds for an expert to go over its books. The money is set aside for school purposes and not for the employment

The Board of Education is essentially a body politic apart from the City of Oakland, however, and just where the line can be drawn is a question which depends on the construction of Section 24."

SAN FRANCISCO, March 16-While trying to figure out where he would get \$1000 in order to avoid going to jail for six months, B. Gurich, proprietor of the Oasis, a road house on the Dublin boulevard, near Oakland, was seized with an attack of heart failure in the United States marshal's office today and is in a serious condition.

Gurich was arrested for having in his establishment six quarts of jackass brandy, two quarts of gin and fourteen gallons of wine. Judge Van Fleet gave him the choice of paying \$1000 or going to jail for six months. He went to the marshal'a office to think it over. He was unable to see where he could raise the money. A physician was called to attend him.

A "Safe First" Story

Roades had made good headway and was accredited with something more than the average business acumen. He was cautious, moreover, and-as he thought—had fully protected the business with ample fire insurance.

But like many careful business men, he had overlooked the most important thing of all. No insurance written could ever make up for the loss of certain of his business records and data. Many of them were absolutely irreplaceable.

And yet, down in the wooden filing case of H. B. Roades & Company, there lay exposed the vital records of their hard carned development, the most important documents the firm possessed.

One night Roades received this message over the wire from his partner:

"The offices are on fire. Hurry"

Of course he was too late, then. The documents were destroyed.

The past two years have gone hard with Roades. In addition to costly and extended litigation, he has had to bear

the expense of gathering an entirely new set of records—all because his office had lacked a good steel safe.

Finally established in another office, he approached H. S. Crocker Company to make sure that his records would be given every protection in the future. Now, he wanted a good "catastrophe proof "safe.

The burglar and fire-proof specifications of the Globe-Wernicke Steel, Safe, the Underwriters' Label guaranteecombined with Roades' own painful ex-perience obviated the need of any sales man's persuasion. All that was required of us was to point out the particular size and type best suited to his particular business.

Roades protected his business after he had let himself be cleaned out —but like you, he could have forestalled all this.

You cannot afford a fire. A relatively small investment will bring you a safe first. Why not consult Crocker today by phone or call?

What Madge Tried to Express to Her Father.

My father spoke no word save the conventional adjeux to Lillian until out taxi was half way to the station. I guessed from the tenseness of his attitude, as with arms folded across his chest he leaned forward, gazing at the boulevard outside, that he was putting an iron hand upon him-self, repressing the emotion that my decision to return home and give him the promised evening with my mother's mementoes had caused nother's mementoes had taused him. Like most men, he abhors the process slangily described by Dicky as 'spilling over.' I surmised that he was perilously near it, so tremendous was the feeling aroused by the prospect of facing the remind-ers of a past long buried, bitterly

Finally, with a deep indrawing of breath he turned to me, and clasped my hands warmly, impulsively, in his own I knew that if it hadn't his own I knew that it it hadn't, been for the lights and the crowded streets he would have taken me into a fatherly embrace. So I nestled closer to him that he might know how deeply I shared his feeling. "My darling," he said, and his voice was husky, uneven. "I shall not soon forget what you have done for me longer."

"Can't you guess, father, dear" I queried softly, knowing what would please him best, "that I have done it for myself, too, that I would and—and—my mother than 2ny-thing else in the world?"

The last words rushed from my lips almost without my own volition.

I had begun the sentence with the primary idea of pleasing my father, but even as I was speaking there had come to me the curious, uncanny conviction that somewhere, somehow, my little mother knew and approved. And, suddenly, I longed for the hour of revelation and reminiscence so soon to come It was as if I were summoned to a prec-

When one sees an array of gowns' and suits from the greatest houses of New York, some of them imported from Paris, one can be quite certain that they represent the Spring mode in its entirel. The various influences which govern fashion are found in each of these different gowns and are well worth noting.

The reflection back to the straight Greek and Roman lines is admirably illustrated in the Thurn evening gown, which gives the straight line from the neck. The jeweled girdle is used in many costumes, serge as well as the lighter materials; and modifies considerably what is known as the "shimmie" line. This same lovely straight line appears in the serge frock from Tuzzola embroidered lavishly in rose, gold and black. the MALLES 'of the species"
That opened the way for some really serious queries as to the evils of our plesent social condition—the poor learning that provide the treets for a living. One of the main queries for a living. One of the main queries came from a man who resented the latt that then always get the blame in the purious that the living and opined that the mowadays" and opined that the mowadays are there if sq-u-e-a-k—SQUEAK' you don't nowadays" and opined to the noused to the noused that the noused that the she "didn't want to." It's a difficult question to discuss in our big family. But here comes a letter which does it have that he autifults.

Here's what I think of "A Brother's Letter" and 'What of Them Women" Just as long as human beings allow their material selves dominate over their spirit-ual selves just so long will there be the need of those "women"—it need which the world freely ad-mits exists. It takes two to make a bargam Hence, if a Brother reents their mingling with our mothers and sisters how about the man mingling with these same mothers and sisters, after coming from these women? If "restricted districts" are so good for the women, why not include their

As to these women "wanting to be there" it has set me thinking. Are they truly to blame for their wanting or is the blame really on the parent, one or both even for generations back, who first allowed their passions to gala the ascendency over their spiritual self control and implanted this trait into the minds of their unborn children? Those children, in turn practicing this inbied trait, deelop it the stronger and in turn pass it on and on until our present wild license in morals is the result. Of course we are all created with this desire but as some plants are stronger and choke out the good plants—so it is with desires within us. The evil chokes out the

There is no thought of the child's right to be born of the highest and best spiritual self within them, of their duty to help form a race of good moral souls. Our animals are bred with far greater care as to their make-up than is the average human being.
"As ye sow so shall ve reap"—
We have made an unspiritual sowing and are now reaping a material harvest. I doubt if true permanent results are to be gained until every young couple entering marriage fully realize the great power within them, which will either build or destroy the world through what they give to the world in the form of their children. There's nothing that Jerry need add to that letter. It is one very fine view of a deep and terrible problem. We ARE our brothers' ceepers whether we wish to be or

Married Life a Failure

Dear Jerry-

I road your letters every evening and think them wonderful. I have never written before, but would like you very much for my nal, too. I have learned to know and love you, from reading your toving anguers to your Pals. Jerry dear, has anything ever been said almut siep-parents:

My father and mother are sep-arated, and are both married again. They have been married since I was a child.

I am a constant reader of your columns and believe me. Jerry, you're a wonder. You have helped you're a wonder. You have helped so many people I am sure that you can help me if you will be so kind as to try. Here's my trouble, Jerry. I am twenty-one years of age and am very much in love with a girl of eighteen. We have been engaged for a little over a year, without her family knowing it, of course. Everything has been going course. Everything has been going along all right until very recently and now, Jerry, her folks don't want us to go together. The only reason they give is that she is too young. Please, please, Jerry, can't you offer some solution to this problem as we are both beart-broken. I have a very good position which holds a very good fu-ture, and, Jerry, we were planning to get married next June. Also I am quite sure that her folks like ma nersonally. At least 1 does; I am not sure of the rest of the family. At any rate, she loves me and I love her and that is all that matters. Another thing, Jerry, we sometimes argue and say things that we don't mean at all and are sorry we said them after-ward. How can we overcome this, Jerry? Forgive me for taking up so much of your valuable time, but

Vast Colemanite Deposit Found in Southern Nevada

IMMEDIATE development of a new and vast colemanite deposit in the vicinity of Muddy Mountain, Southern Nevada, is announced by the West End Chemical Company of which F. M. Smith, Oak-land borax magnate, is head.

Colemanite is the basic raw material from which borax is refined. The deposit lies eighteen miles from the Salt Lake railway and the West End Company, it is reported, has made a \$50,000 deposit on the property to hold it after a spirited contest for control.

George Hartmann and Francis M. Lovel, prospectors, are credited with the find. They took an option and rushed Smith to the property, arriv ing on the last day of the option after a difficult automobile ride of more than forty miles over rough country.

The colemanite deposit is described as one of the largest in the world. The proposal of the company is to build a road to the begin mining and conduct Califor-nia refining at the Searles Lake plant. Raw colemanite also is to he shipped east, it is stated:
